2. HIGH-FIDELITY UI SCREENS

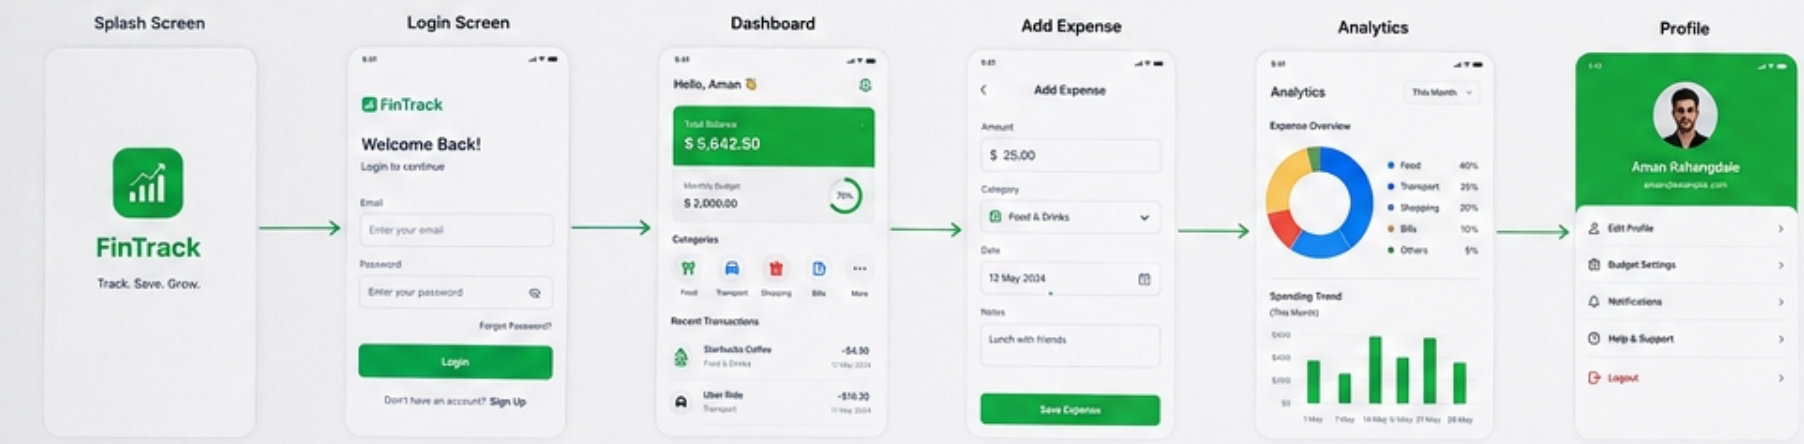

3. INTERACTIVE PROTOTYPE (USER FLOW)

5. DESIGN DECISIONS

- User-Centered Design**
Designed keeping students and working professionals in mind for easy expense tracking.
- Clean & Minimal UI**
Used clean layout, white space and consistent colors for better readability.
- Quick Actions**
Added '+' button and shortcuts for faster expense entry.
- Visual Insights**
Used charts and summaries to help users understand spending patterns.
- Consistency**
Maintained consistency in colors, typography, components and spacing.
- Trust & Clarity**
Green color builds trust in finance and the UI clearly communicates important information.

6. DESIGN EXPLANATION

- The app follows a clean and modern design to provide a smooth financial management experience.
- Green is used as the primary color as it represents growth, balance and financial well-being.
- Important information like balance and recent transactions are highlighted to improve user focus.
- Icons and illustrations are used to make the interface more intuitive and engaging.
- The design is fully responsive and optimized for mobile devices.
